

WHAT WOULD HAPPEN IF YOUR GENERATOR FAILED TO START?

OMNIMETRIX CAN MONITOR YOUR GENERATOR 24/7

The emergency power system is in place for a very important reason...to provide critical backup power in the event of a utility power outage. Your business can't afford to be without power.

Even though today's generator systems are extremely reliable with regularly scheduled maintenance, there are a number of factors that could reduce that reliability at any moment. OmniMetrix monitors your generator 24/7 and alerts you immediately of all alarm conditions via text or email.

ELIMINATES 95% OF FAIL-TO-START SITUATIONS

Today more than 10% of all installed generators are unable to start and carry a load. These potential failures are rarely mechanical problems. **OmniMetrix monitors are compatible with ALL generator brands** and accurately pinpoint systems that could potentially fail-to-start.

Key Failures:

- Low Battery Voltage
- Low Coolant Temperature
- Missed Exercise
- Low Fuel
- Unhandled Systems Alarms
- Plus Many More!

Wireless remote monitoring from any internet device means...

...your service tech knows when to come out, and what to bring, which means...

...you're protected 24/7.

WE PROVIDE A HIGHER LEVEL OF SERVICE.

31,536,000 INSPECTIONS PER YEAR

OMNIMETRIX REMOTE MONITORING DELIVERS:

- Improved Reliability
- Weekly Activity and Status Reports
- Time and Date Stamped Event Logging
- Peace of Mind
- Internet Access Portal
- Data Archiving
- Instant Alarm Notification
- Customizable Reporting
- Rapid Service Response

CONNECTED TO YOUR GENERATOR.

OMNIVIEW

The Data Management Center, OmniView®, is the real power behind the monitoring system. It connects you instantly to real-time data and historical information on an entire fleet, or you may view diagnostics on a single unit.

Unit Status

- System or Fleet Diagnostics
- Daily Usage / Run Hours
- Site Comparisons
- Remote Testing

Alarms

- Instant Alarm Notification via Email or SMS Text
- Detailed Alarm / Fault Display

Location

- GPS Mapping
- GPS Landmarking
- Zone Reporting

History Reports

- Standard & Custom Reporting
- Data Exporting

Security

- Secure & Redundant Service with Data Archiving
- Remote Management
- Data Recovery

Trouble Tickets

- Alarm Escalation Service
- Customized Administration
- Resolution Management

KNOW BEFORE YOU GO!

Signing up for OmniMetrix monitoring gives service providers the capability to review a generator's history BEFORE climbing into a truck. Better knowledge means a high first trip success rate for problem resolution and less down time for you!
