

## Residential Generator Monitoring

### TrueGuard 2™

- ✓ Failure is not an option, reduces 95% of "Fail to Start" events
- ✓ True "Peace of Mind" for your generator
- ✓ When weather or unintended issues arise, keep your HVAC, appliances, medical equipment, home security, computers and internet running
- ✓ Get proactive about maintenance to ensure your generator starts when needed
- ✓ Stay informed of battery, fuel, exercise schedule, run times and if generator is in the "Off" position, as well as many others

### Communication Options

- ✓ Receive email and/or text messages with important information about your generator
- ✓ 24/7/365 access to OmniView®, our cloud-based dashboard shows the status of your generator

**Made in USA**

### Wireless Connection

- ✓ Increases reliability and security
- ✓ Not dependent on Wi-Fi systems which could fail during an outage

**OmniMetrix TrueGuard 2 works on all major brands of residential generators, including:**

**OMNIMETRIX**  
GLOBAL MONITORING + CONTROL
