# OMNIMETRIX

GLOBAL MONITORING + CONTROL

**Preventing pipeline corrosion requires the best technicians with the best equipment.**

Corrosion never sleeps and the tools you use to prevent it shouldn't either. OmniMetrix provides the most accurate and longest lasting pipeline monitors in the industry. Our cathodic protection monitoring solutions can be found on rectifiers, test station and bonds and work 24x7x365 to provide vital information you need to make important decisions about your pipeline. With our modular and customizable solutions, OmniMetrix is the leader in remote monitoring solutions.

## HOW IT WORKS

With cellular transmission through OmniMetrix, cathodic protection specialist have access to unlimited data gathering for one flat rate. Pull whatever information you need as many times as you like at no additional cost; it's your data.

With over 25 years of experience and thousands of monitored assets, OmniMetrix is the proven solution for making critical systems and pipeline protection more reliable. Whether you are a small business or Fortune 500 company, we have you covered for all of your cathodic protection needs.

## UNLIMITED GPS INTERRUPTION

The Hero Rectifier Monitor includes GPSsynchronized rectifier interruptions. Command one or multiple rectifiers remotely through our online portal, OmniView. Schedule on times, off times and daily schedules simultaneously.

## APPLICATION & BENEFITS

With you can cause your generator not to start, including:

- Rectifier, test station and bond monitors
- AC current density measurements
- Pipe-to-soil
- Cellular or satellite
- No custom software
- Instant alarm notifications via email and/or text
- Free over-the-air software updates
- Eliminates manual data collection costs
- USA based customer support team
